

T-CRYO CHEF

APRON FOR CRYOGENIC PROTECTION
FOOD CONTACT APPROVED

T-CRYO CHEF is a completely waterproof apron (waterproof) to protect the front part of the body in operations that involve the use of liquid nitrogen (or other cryogenic gases).

Made with specially designed composite materials for this application. Tested, with success, by contact with liquid nitrogen (-195.82 ° C) for one minute and the next test of flexibility (RCT method).

3rd category CE certification

SPECIAL FOR KITCHEN USE

Warning! Persons handling cryogenic gases must be familiar with the risks that they involve, and should be adequately trained to handle security operations. Must also be established emergency procedures and adequate training of all functioning equipment. The cryogenic gas should never be handled without proper protective equipment.

Caution! Not intended for immersion in liquid nitrogen or other cryogenic liquid.

Features

The apron is made by a special composite and coupled multilayered fabric, completely waterproof to liquids. Adaptable to each individual through laces with clip buckles at the neck than the waistband, Dimension 70 x 90 cm.

Suitable for food contact (*)

Application

Suitable for all work in the presence of liquid nitrogen to prevent burns in the event of leakage of the liquid gas, especially in transfer operations:

- Biology
- Biobanks
- Food industry
- Molecular cuisine
- Ice Cream
- Chemical industry
- Scientific research
- Environmental Technologies
- Medical Technologies
- Computing
- etc.

(*) Test carried out by 'Istituto Zooprofilattico Sperimentale della Lombardia e dell'Emilia Romagna "Bruno Ubertini".
