Gold Freeze

***Mitten made of
aramid fabric with chain***

Product code:

H111B130-ST

These gloves made of aramid fabric with stainless steel wire mesh glove are appropriated when working with sharp-edged hot parts up to 1100°C. With the chain, the heat does not get direct contact with the aramid fabric. Due to the individual design the glove remains flexible, it is ambidextrous, has a double lifetime and therefore cost-saving.

Application area: transport hot castings, glass and steel industry, furnaces, etc.

- *Very cut resistant, flexible*
- *Ambidextrous*
- *Double insulated*
- *Length ca. 300 mm*
