

**Mitten made of glass fabric
with silicone coating**

**JUTEC®-Item number:
H2110030-GS1**

These gloves made of glass fabric with heavy silicone coating are ideal for working on hot furnaces.
Especially pay attention to the weight of the transported workpiece, which takes effect on the convective heat.

Use: Transport of hot firebricks, glass industry, construction of furnaces, etc.

- Abrasion-resistant
- Moisture-proof
- Double-insulated
- Length: 300 mm
